

Super Grid

For Microsoft Dynamics CRM

Microsoft Dynamics CRM

Super Grid for Microsoft Dynamics CRM 2011 and CRM Online is an industrial-strength add-on for implementing intuitive custom CRM in-place record edit and entry to any View and Sub-Grid to save lots of time and clicks in any CRM Entity. Build your own unique “My Work” dedicated editable work areas.

Super Grid Works by adding a Silverlight graphical UI “overlay”, to CRM standard or custom Views and works with all field types, all CRM Views including sub-grids standard and custom. Settings area allows easy complete grid implementation Entity Administration and Enhanced Scripting and Security above Role compliance - allows easy configuration

control. **Super Grid is a joy to work with.**

example.cor	Default Value	87
	Default Value	12

example.cor	Default Value	12

Change Pick-list fields fast

Super Grid makes volume record entry & editing a snap! Edit Any View/Grid with Enhanced Microsoft CRM security.

Super Grid is an example of the unique technology MTC applies to custom solution development.

Super Grid System

For Microsoft Dynamics CRM

Solution Development ■■■ BY

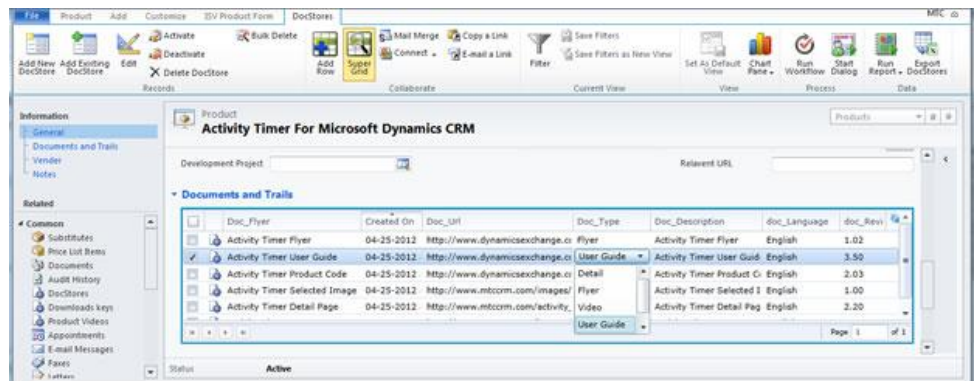

**Let Super Grid System show you MTC’s Silverlight custom grid Solution expertise.
Super Grid is Excel style data handling in CRM View or Sub-Grid, enhanced.**

Feature Set:

Easy intuitive In-place Editing
Auto Save or On-demand Save
View Search and Paging Enabled
Works with All Ribbon buttons

Add and edit records faster than ever before for an instant gain in productivity! Use anywhere in CRM

Add continuous new records without opening any sub-windows or forms.

Edit all data in any set without ever leaving the grid, **even down a column of records - as with Excel**, to maximize data handling speed. Data accuracy improves by the ease of data correction - encouraging data error maintenance in all levels of the company, which is a big return for your investment in Super Grid.

Super Grid

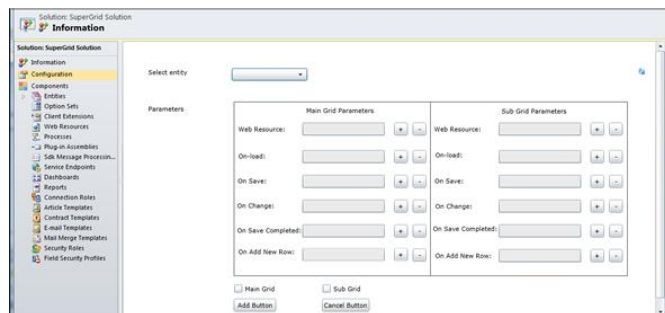

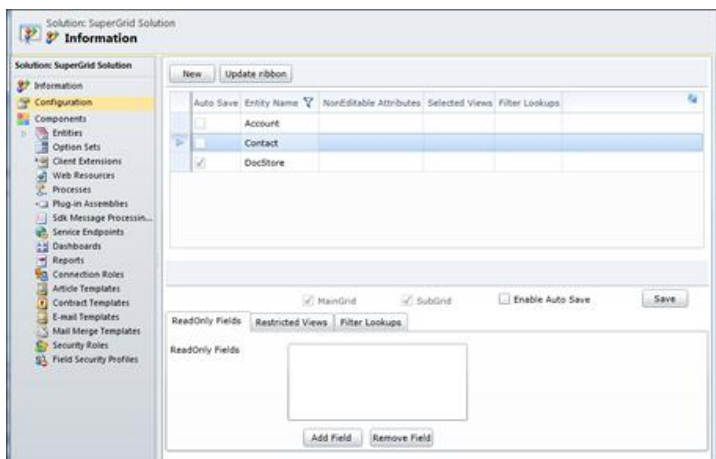

For Microsoft Dynamics CRM

The significant improvement in the efficiency of adding and editing records results in greater data sets being included in CRM resulting in more marketing reach, improved sales.

Global Grid Admin & Scripting

Once installed in CRM Super Grid Settings is quick and easy to add and configure, adjust any Entity Views or Sub-Grids.

Above CRM's full security compliance Settings, controls to add Read-Only Fields, Restricted Views, and Filter Look-Ups.

Super Grid adds a new layer of control of your data UI. CRM Forms and fields have scripting but the data record in the grid is not in a form, so Super Grid includes intuitive tools to script as if on the form and with added flexibility.

User Experiences:

- ✓ Sales Administration will be delighted with the new ease of creating, and refining through in-grid editing, data sets they use in handling of quotes, orders, invoices, leads, products, and other high-volume work functions.
- ✓ The Marketing team will wonder how they ever added and manipulated all the records of data they constantly need to update without Super Grid. Building new and accurate data sets now becomes a snap!
- ✓ The Accounting staff will appreciate the familiarity now brought to the Customer Relationship Management xRM solution with the 10-key movement controls they are so used to and expect in their job.
- ✓ C-Level Managers will appreciate the enhanced user control of CRM data now afforded them as more appropriate, comfortable, and efficient for their periodic updating needs
