

This little easy to install button is the beginning of better CRM data quality, better sales, more opportunities, increased marketing performance, more sales and more to the bottom line. And it is a free update. Pretty good button to have . . .

It's About Having Information at Your Fingertips!

The "About" function is an incredibly powerful and useful tool. The Dynamics CRM "About" function coupled to the ability to validate my data and add additional CRM Contacts I may need in the sales cycle on-the-fly with only a couple clicks is absolutely fantastic. I can't believe I worked without this this long!

Gabe Smith – C.E.O. Visucate

New Microsoft Dynamics CRM "About" Button . . .

Simply, Improves Sales.

Add Contacts

Close

It is About Knowing the “Who” that is Important to the Deal . . .

The “Add Contacts” function new to Microsoft CRM is indispensable. After I validated my data in CRM, I started to add additional CRM Contact breadth in sales cycles on-the-fly . . . and then selected my Scheduled Contact Depth Increase, and soon my marketing performance improved visibly each month. This is my kind of free update.
